KOOBRICK

Jensen SCANDINAVIA

Hello Wifi!

The latest wireless technology in a beautifully concealed package

Designed for your Home

Wifi and all the KooBricks are designed to compliment the interior of a home without standing out as a technical gadget.

2x Fast

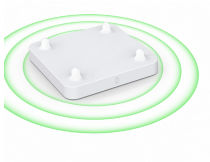
WiFi utilizes dual band technology, allowing it to provide standard 2.4ghz as well as the more advanced 5ghz Wireless standards.

Back me up

Stay in control of your files and make sure that you never lose anything again.

Join Forces

WiFi works well as a stand alone Wireless router but it shines when used in connection with other Koobricks like Boxi and Roomi.



Dual Band Gigabit Speed

WiFi supports the industry standard 802.11 Wireless networking. There are several flavours within this standard and all KooBricks support the most common A,B,G, and the latest N. This ensures that WiFi always works well with all your wireless products.

As Simple as 1,2,3

WiFi offers a smooth and easy way to setup and configure your Wireless network. Simply access WiFi from any web browser to set name and password for the wireless network and access more advanced features.

A Perfect Fit

KooBricks are modular; you can mix and match them to suit your specific needs.Collect all your wireless equipment in one place with WiFi and Roomi or create a full home media centre by adding Boxi. Every KooBrick have knobs to lock into the feet of other KooBricks, so that when a new KooBricks enters your household it easily fits in.

Spesifications

Wireless

- Concurrent 2.4GHz and 5GHz 802.11n Wireless Access Point
- Complies with 2.4GHz and 5GHz IEEE802.11 a/b/g/n standard
- 600 Mbps wireless speed (2,4Ghz 300Mbps + 5Ghz 300Mbps)

MIMO technology, enhancing the throughput and coverage range significantly Pre-secured wireless network

General Features

- USB 2.0 port for connecting external USB storage devices, like USB memory stick or USB hard drive
- Easy to use Web User Interface
- Internet scheduler
- Wireless network scheduler
- Built-in Firewall with SPI and DoS
- Wireless security: WPA2-PSK, WPA-PSK and supports 64/128-bit WEP Encryption
- Virtual Server/DMZ
- WMM function to meet the multi-media data bandwidth requirement
- VPN Pass Through (IPSec/PPTP)
- Firmware Upgrade

Security

- Wi-Fi Protected Access™ (WPA/WPA2)
- Wireless Security WPA2, WPA, WPA-PSK, TKIP/AES
- WEP – 64/128-bit encryption
- 802.11x User Authentication
- Client Mac-address locking
- NAT firewall, SPI and DoS

Hardware

- Built in 802.11n AP (2.4GHz and 5GHz)
- Highly integrated CPU
- 1 x 10/100/1000 Gigabit Ethernet WAN port for connecting high speed DSL or cable modem
- 2 x 10/100/1000 Gigabit Ethernet LAN ports for computer or other network device connection
- 1 x USB for storage
- Reset and WPS on back
- Status button on front
- Power Input
- Integrated Power Switch

Packaging

Modelno: K0001
EAN: 7070290002186

In the box:

- KooBrick WiFi Wireless Router
- Power Supply (with Europe standard plug)
- Quick Start Guide
- 3x LAN Cable

Dimensions:

- Product size: 25,5 x 188 x 188 (Height x Width x Depth in mm)
- Color box size: 100 x 238 x 238 (Height x Width x Depth in mm)
- Quantity in Carton: 5 pcs
